

Zinc 168 LITE

Cold Galvanizing Zinc Spray

Zinc 168 LITE is a cold galvanizing zinc spray having 99% pure zinc content providing corrosion protection to ferrous metal surfaces. Optimum metal surface appearance & exhibits long term corrosion protection comparable to hot-dip galvanization. Zinc acts as the sacrificing material thereby protecting the base material even when scratched or abraded.

Applications

- For optical improvement, repair and protection against corrosion of metallic surfaces.
- For touch up on galvanized surfaces damaged due to cutting, drilling and welding.
- Used on damaged galvanized surfaces, steel structures, cable trays, GI gratings, GI steel pipes & tubes, towers, automobile underbodies and parts, off shore steel structures, power plant, chemical plant, transmission towers, trailers, storage tanks, metal roofs on the underground distribution.
- Used on ducting, wire fences, bar gates, road signs, traffic light posts, ramps and various other types of steel construction.

Benefits

- High purity zinc enriched coating.
- Actively fights against rust and corrosion.
- Protects structures from sea water corrosion.
- Provides excellent cathodic protection.
- Substitute of injurious to health paints.

Instructions

- The application surface must be clean, dry and free from grease.
- Remove rust and old loose paint, then sand and clean.
- Shake the can vigorously for at least 2 minutes before use.

Net Content : 440 ml / 345 gms

Excellent corrosion protection

Outstanding weather resistance

Box packing : 24 Pcs / Box
